Item #	Description	Adequate	Inadequate	N/A	Shared space?
1	Rooms are clean, safe, sanitary and free of odors				
2	Smoke detectors operate properly and fire extinguishers are properly charged.				
3	All plumbing is working properly and there are no leaks of toilets, faucets, hot water heaters, tubs, etc.				
4	Buildings and ground are free from hazards (e.g. broken glass, exposed electrical wiring, protruding nails, etc).				
5	Walls & ceilings are clean and in good repair.				
6	Fixtures are in good repair.				
7	Passageways, stairways and doors are not blocked or obstructed in a way that prevents safe passage in case of emergency.				
8	Bathroom tile possesses few or no cracks or flaws.				
9	All owner supplied kitchen appliances (stove, refrigerator, garbage disposal, microwave, etc.), if present, are in working order.				
10	Windows, glass doors, and screens have no breaks or tears. They all have properly operating locks.				
11	Window coverings, e.g. mini-blinds, vertical blinds, or drapes are in proper working condition.				
12	Paint/wallpaper is in good condition.				
11	Flooring, e.g. linoleum, tile, carpet, etc. is secure and in good repair.				

SILP Home/Apartment Inspection Checklist

12	Heating units and when present, air conditioning units, are functioning properly.				
13	The filter in the furnace is new or clean.				
14	All built-in shelves and storage bins are in good working condition (e.g. hinges secure).				
15	All electrical outlets are working properly. There are at least two outlets or one outlet and a ceiling or wall mounted light fixture in every room.				
16	All lighting is functional and fixtures are properly secured.				
17	The walls, ceilings, and window casings are free of evidence of water leaks and there is no visible mold.				
18	All exterior (security) doors close properly and all have properly functioning locks.				
19	Exterior lighting is adequate to properly light the path of travel and provide protection for the residents.				
20	There are acceptable fire exits from the building that are not blocked.				
21	The unit is free from evidence of infestation of rats, and severe infestation of mice, vermin, and bugs.				
22	Pools, ponds, spas and other bodies of water are made inaccessible through fencing at least 5 feet high or locked covers that can support the weight of an adult. Above ground pools may be made inaccessible by removing the ladder or erecting a barricade to prevent access to the decking.				
23	Firearms and other weapons shall not be stored in the unit without proper permits.				
24	Yard and common areas surrounding the unit are free from hazards, e.g. broken glass, exposed electrical wiring, fire hazards.
